

CARPENTRY AND MAINTENANCE SERVICE P/L

First Transition Unit Sold Nationally Letter from Michael & Chris Welch, Trangie IGA

We purchased our Transition Fruit and Vegetable Units at Expo last year and had them installed in August 2006. The unit displays fruit and vegetables allowing customers to view all available products with ease, is easy to clean and maintain and encourages staff to rotate efficiently. The unit concept allows flexibility as it can be used in multiple combinations or as a single stand alone unit. We found this unit to be the most cost effective and has suited our needs perfectly. Our sales increased immediately.
