Dear Potential Customers

Our store recently changed to an IGA Express and has undergone a major facelift. During the whole process we have had to deal with many different companies to source all the equipment we needed for the store.

We met with Brian who was recommended to us by IGA as we had to get Magazine stands made to accommodate our new agency range. Brian was able to provide us with specific information photographs and examples of his work which enabled us to quickly and easily decide on what we wanted. We were also able to visit his showroom to see examples of all the equipment and different layouts available to us.

When everything arrived we were so impressed with the impact it made in the store. The magazine stands were perfectly designed to hold a lot of stock and displayed everything beautifully. Even our customers were impressed, as they actually thought we had increased our range! Since then we have been able to maintain the area with ease, saving our staff a lot of time.

The express checkouts and produce bins supplied look fantastic, they were easy to put together and are very practical in design.

I would highly recommend Brian and his company. Each time I have dealt with him or his staff they have been more than helpful and extremely courteous. We were kept informed on delivery dates which was extremely important for us to maintain our works schedule.

Yours truly,
Donna Naylor
General Manager
